Senior .NET Engineer

ABOUT US

Our client is a well-established and highly successful leading provider with over 2200 talented employees worldwide of an extensive range of healthcare advice, strategies, and solutions with operations in the United States, Canada, United Kingdom, and Australia for the past 35 years.

They are currently having a fantastic opportunity for experienced and passionate customer-focused software developers who are self-motivated, have a passion to deep dive into technology, and seeking to work in a dynamic and engaged organization to join in their growing team. You will be reported to the Team Leader and responsible for the delivery of high-quality software and innovation through technology. You will also be pivotal in several key projects and initiatives.

JOB RESPONSIBILITIES

- Designing, developing, developer testing, and delivering custom software solutions whilst collaborating with stakeholders.
- Ensuring code produced is to a high quality and follows our coding guidelines.
- Reviewing code from other team members and critically assessing the code for high quality design and adherence to our coding guidelines.
- Actively contribute to solution design discussions and present technical design options for consideration.
- System configuration and integration.
- Maintaining and supporting existing software.
- Support team members to solve application related issues.

QUALIFICATIONS:

- Between 5-8 years' experience in a similar role.
- A passion for SOLID Principles, Clean Code, and solution design.
- A desire to deeply understand how technologies work.
- Superior communication skills, both verbal and written.
- The ability to organise and manage multiple priorities.
- Demonstrated experience with C#, .NET framework and Agile software development.
- A tertiary degree in IT or related field (desirable).

Previous experience with the following will be favourable:

- Technologies and Frameworks - ASP.NET Core, MVC4, C#, Vue.js, HTML5, CSS3+, JavaScript, LINQ, Entity Framework, TSQL, ASP.NET (Web Forms).
- Tools - Visual Studio, SQL Server Management Studio, ReSharper, Git.
