

The Opportunity

ASW is currently looking for a **Lead Data Scientist**, you will be responsible for solving business problems, predicting, and measuring outcomes, exploring new opportunities, and generating insights in collaboration with business units.

Key Responsibilities

- Responsible for building analytic systems and predictive models as well as experimenting with new models and techniques.
- Interpret and analyze data problems and guarantee data quality and integrity.
- Lead data mining and collection procedures.
- Responsible for the conception, planning, and prioritizing of data projects.
- Adhere to stringent quality assurance and documentation standards using version control and code repositories.
- Ensure that data projects align with organizational goals.

Skills, Qualifications & Experience

- Commercial experience as a Data Scientist or related working experience.
- Expertise in data visualization libraries and products (e.g., PowerBI, Tableau).
- Very detail oriented, expected to ensure a high level of quality in report, data, and model analysis.
- Proven skills in translating analytics output to actionable insights and recommendations.
- Solve business problems using a wide variety of data science techniques.
- Customer segmentation and propensity modeling experience would be valuable.
- Experience in leading projects would be valuable but not essential.
- Excellent time management and communication skills.
- Excellent analytical skills with the ability to provide actionable insights.
- Strong attention to detail.
