

POSITION DESCRIPTION

POSITION TITLE: System Engineer

ADVERT TITLE: System Engineer

LOCATION: MALAYSIA PHILIPPINES VIETNAM

ASW COMPANY OVERVIEW

ASW is creating the world's most talented international family through hiring and growing talent into long-term careers with Australian companies. ASW is a recruitment and talent specialist, that partners with Australian companies to help them build highly capable international teams. We enable Australian companies to meet their business goals by accessing and retaining premium talent in emerging markets and giving that talent the opportunity to grow, learn and develop. Together we embed international teams into respected Australian businesses, both functionally and culturally, to deliver enduring and transparent people solutions.

THE OPPORTUNITY

The Systems Engineer role is part of the Systems Architecture team who are responsible for supporting the build and deployment technology used across multiple project streams and applications. You are part of a team implementing Continuous Integration and Continuous Delivery practices to improve the quality and delivery of our technology solutions to customers. You will work with multiple teams across countries on resolving issues raised by both internal application development teams and external clients to assist in supporting their development, integration, testing, UAT and Production environment.

KEY RESPONSIBILITIES

- Build, configure and install the required software and applications on both physical and virtualised servers
- Maintain existing servers and application stacks and identify opportunities for improvement
- Provide technical support across various servers and applications
- Ensure the quality of the deployment guides meets the required quality and that these guides have been verified as operationally correct
- Identify opportunities to improve the efficiency of tasks that are regularly performed through the application of automation
- Establish and define standards and procedures for environment and application deployment support
